5. Screenshots, Demo video, Output Results
6. Performance Analysis
7. Advantages of Proposed System
8. Limitations and Future Enhancements
9. Conclusion
10. References
11. Thank you

Introduction

- SchemeSync Navigator is a web-based platform designed to simplify the discovery of Central and State Government schemes.
- Users can browse schemes by categories such as Education, Technical, Women, Backward Class, Food, Agriculture, and more.
- The system provides a unified, user-friendly interface to access structured scheme information.
- It helps bridge the awareness gap by making welfare schemes easily accessible and understandable.

Problem Statement and Objectives

Problem Statement

Government schemes are scattered across different portals, making them difficult for citizens to find and understand.

Lack of category-based filtering and unified search leads to poor awareness and accessibility.

Objectives

To build a centralized platform for browsing government schemes.

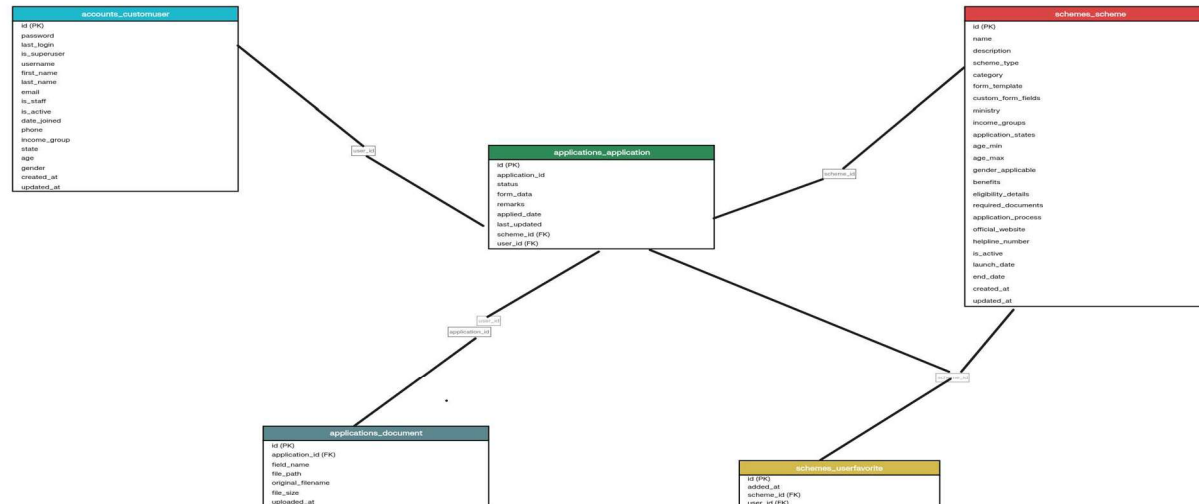

To categorize schemes for easier discovery.

To provide fast retrieval of scheme details through backend APIs.

To create a responsive and intuitive frontend for users.

System Architecture

DB Schema - All Tables

Implementation Details

Frontend

- **Admin Panel:** Dashboard, Scheme CRUD, Application management
- **Auth:** Login/Signup
- **User Panel:** Schemes, Apply, Profile, Favourites
- **Layout:** Protected Routes
- **Context:** Auth state & token refresh
- **Services:** API integration
- **Styles:** SCSS & themes

Backend

- **Accounts:** Auth + Profile
- **Admin API:** Admin stats & controls
- **Applications:** User applications + Documents
- **Schemes:** Scheme CRUD + Favourites
- **Core Backend:** Settings, DB, URLs
- **Media:** Document storage

Implementation Details

- **accounts_customuser** → users & profiles
- **schemes_scheme** → scheme details
- **applications_application** → user scheme applications
- **applications_document** → uploaded files
- **scheme_userfavorite** → saved schemes

SchemeSync_Navigator Connecting citizens with government schemes © 2025 SchemeSync_Navigator. Built for the people.

Performance Analysis

- API response time averages **0.2–0.3 seconds** in local environment.
- Frontend loads pages quickly due to optimized component structure.
- Efficient filtering results in reduced search time for users.
- System handles increasing number of schemes without performance drop due to lightweight JSON-based architecture.
- Comparison with manual search on government websites shows **>90% time reduction** in finding relevant schemes.

Advantages of Proposed System

- Provides a **centralized** platform for accessing government schemes.
- Simple, intuitive, and **user-friendly** interface.
- Category-based navigation improves user experience.
- Fast search and retrieval using REST APIs.
- Scalable architecture for future enhancements.
- Helps increase awareness and accessibility of welfare schemes.

Limitations and Future Enhancement

Limitations

- Manual data entry required for adding new schemes.
- No real-time integration with government APIs.
- No user login or personalization features.

Future Enhancements

- AI-based recommendation engine for personalized scheme suggestions.
- Automatic scheme updates through web scraping/API integration.
- Mobile app version (Android/iOS).
- Multilingual support for regional languages.
- Admin dashboard for scheme management.

Conclusion

- SchemeSync Navigator successfully centralizes government schemes and simplifies user access through an intuitive and efficient web interface.
- The project meets its objectives of categorization, fast retrieval, and improved awareness.
- It lays the foundation for advanced features like recommendations, automation, and support.
- Overall, the system contributes to boosting digital governance and public welfare accessibility.
